EFFECT OF INSECT GROWTH REGULATOR, CGA 211446, ON THE THIRD INSTAR OF THE HEART-SHAPED SCALE ON AVOCADOS

W P Steyn, W J du Toil & E A de Villiers
Institute for Tropical and Subtropical Crops, Private Bag X11208, Nelspruit, 1200, RSA

The under mentioned figures were omitted from the above article. Please refer to the SAAGA YEARBOOK 1993 P 116.
FIG 3
Scale counts on avocado leaves 12 weeks after treatments

Mean \{\log X + 1\}^*

*X = Actual number of live scales present. Means followed by the same letter do not differ significantly from one another (p = 0.05).

FIG 4
Scale counts on avocado leaves 16 weeks after treatment

Mean \{\log X + 1\}^*

*X = Actual number of live scales present. Means followed by the same letter do not differ significantly from one another (p = 0.05).
FIG 5
Scale counts on avocado leaves 20 weeks after treatment.

Mean [[(log X + 1)]*  

* X = Actual number of live scales present. Means followed by the same letter do not differ significantly from one another (p = 0.05).
