ACKNOWLEDGEMENTS

The author is indebted to his promoter, Professor J.M. Kotzé, Head of the Department of Microbiology and Plant Pathology, University of Pretoria, for his guidance and encouragement throughout this study.

Grateful acknowledgement is made to the Management of Westfalia Estate, in particular to Mr. F.J. Lourens, Dr. D.L. Milne and Mr. J.C. Toerien as well as the South African Avocado Growers' Association for the financial support that made this work possible.

The kind co-operation of the Section Managers at Westfalia Estate and the assistance of Mr. J.T. Ramathoka is greatly appreciated.

Grateful appreciation is expressed to Dr. D.L. Milne for his valuable help during the writing-up of this thesis.
